

$1/4$ $3/3$ $5/8$ $8/9$ $6/6$ $1/1$ $3/4$ $7/9$ $3/5$ $2/9$

Give each player a copy of the fraction sheet. Each player puts a game piece of their choice on any square on the playing board. Players take turns rolling the die and moving in any direction. What fraction did you land on? Colour that fraction or an equivalent fraction in on the fraction sheet. You must colour in the exact fraction or an equivalent of, not more or less, each time. Play until one player completely colours in all nine of their fraction squares. Use colourful markers to make the game more fun.
